

16-19 Tuition Fund

COVID and lockdown impacted on our students in a number of different ways. The majority continued to achieve and successfully completed their study programme. A minority struggled to learn and did not complete their functional skills programme which continued to be assessed through external written tests. We have developed a support programme funded through the Tuition Fund that has allowed them to extend their functional skills course for the first 12 weeks of this term, prior to starting a new study programme at the next level.

Additional support will be offered as either 1 to 1 or small group for all students who do not achieve at least one level of improvement in their English and Maths by the end of term 2. Monthly reviews will highlight progress concerns and individual action plans created to ensure timely interventions.
